

## INDIVIDUAL SAMPLE PREPARATION

Finding the right mill is easy: Simply send us a sample of your choice – we will conduct a sample grinding and send you an individual grinding report and recommend an instrument suitable for your application. Please complete the form completely and **email it in advance to [lab@fritsch-us.com](mailto:lab@fritsch-us.com) and send us the material together with the print out of the completed form.**

If you would like to send an additional sample (max. 2 samples) which differs in regards to consistency, desired sample quantity or final fineness, please complete a second form for this second sample.

**The fields marked with an asterisk\* are required fields and have to be completed!**

### Your information about the material

Name of the material\*:

Chemical formula:

**Hazardous material\*:**  yes<sup>1</sup>  No  
 (\*Please enclose safety data sheet!)

explosive  toxic  caustic  oxidising  environmental hazard

easily flammable  harmful to health from:

Do not put in contact with:

### Material properties

hygroscopic pH-value:  Humidity:  %

The material may be:  embrittled  Up to  °C dried / heated

Soluble in:

Other:

### Task

Which sample quantity should be ground per charge\*:  g  ml

Max. particle size of the material to be ground:  mm  µm

Which final fineness should be obtained\*?:  % <  mm

*Attention: For obtaining particle sizes < 30 µm, in most cases a wet grinding is required!*  % <  µm

Is wet grinding tolerated?  yes  no

If yes, with which liquids\*?

During dry grinding may – anti-sticking agents or other surface active substances - be added?  yes  no

If yes, which\*?

### Which mill should be utilized?

Please select the suitable mill for our requirements!

### Since abrasion is unavoidable, which materials for the grinding tools do you prefer?

- |   |   |   |   |
|---|---|---|---|
| <input type="checkbox"/> SiO <sub>2</sub> agate   | <input type="checkbox"/> Al <sub>2</sub> O <sub>3</sub> sintered corundum | <input type="checkbox"/> Si <sub>3</sub> N <sub>4</sub> silicon nitride | <input type="checkbox"/> ZrO <sub>2</sub> zirconium oxide |
| <input type="checkbox"/> stainless steel  | <input type="checkbox"/> hardened steel                                   | <input type="checkbox"/> hardened, stainless steel                      |   |
| <input type="checkbox"/> WC + Co hardmetal tungsten carbide   |   |   |   |
| <input type="checkbox"/> manganese steel possible with Jaw Crushers and Disk Mills                            |   |   |   |
| <input type="checkbox"/> chromium-free steel possible with Cutting Mills, Jaw Crushers and Vibrating Cup Mill |   |   |   |
| <input type="checkbox"/> hard porcelain possible with the Mortar Grinder                                      |   |   |   |
| <input type="checkbox"/> pure titanium/TiN-coated steel possible with the Variable Speed Rotor Mills          |   |   |   |

Which analysis follows?

According to which norm/standard should be worked? DIN / ISO / ASTM

How was your material previously comminuted and which results can you share with us?

Remarks:

Would you like to receive an offer?  yes  no

Should not needed material be returned?  yes  no

---
